A brief presentation on how to make your personal environment

"A Step Above"

*"I've always admired stained glass,
but I don't want my house to look like a church.
What are my options?"*

We can help you find the look that is just right for your environment. Choose your style from:

- Traditional - formal or informal
- Contemporary - simple to complex
- Representational - any subject
(if it can be drawn by line we can re-create it in glass)

One of several techniques will be used to create your special project:

- Leaded glass construction
- Tiffany - style
- Etched glass
- Carved glass
- Beveled glass

*Each design is created especially for you
with your choices, and not from someone else's
catalog of stock designs*
